Problem Statement

To develop a Personal Expense Tracker Application that helps its user to keep track of expenses and notify the user in case of exceeding the limit of spending of a particular amount via email.

Ideally, a normal person would suffer to keep track of his daily expenses in his mind. This leads him to forget the entire expense history and make him wonder where the money has gone. The proposed expense tracker application makes sure that the expenses are tracked category wise. It also provides monthly, daily and semi-annual expense-based graph analysis of the expense done.
